

Heat pumps

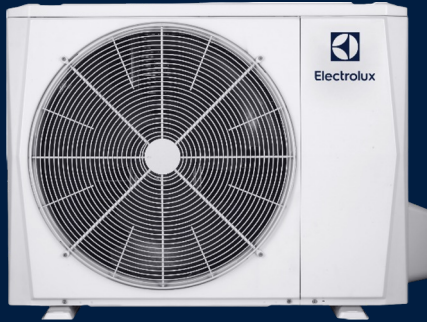

Electrolux

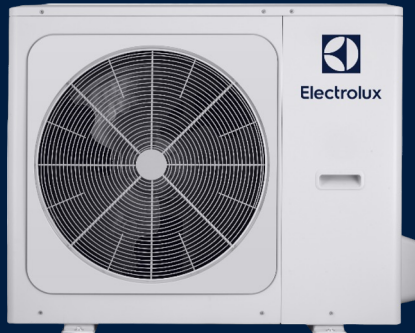

Product range

Outdoor units

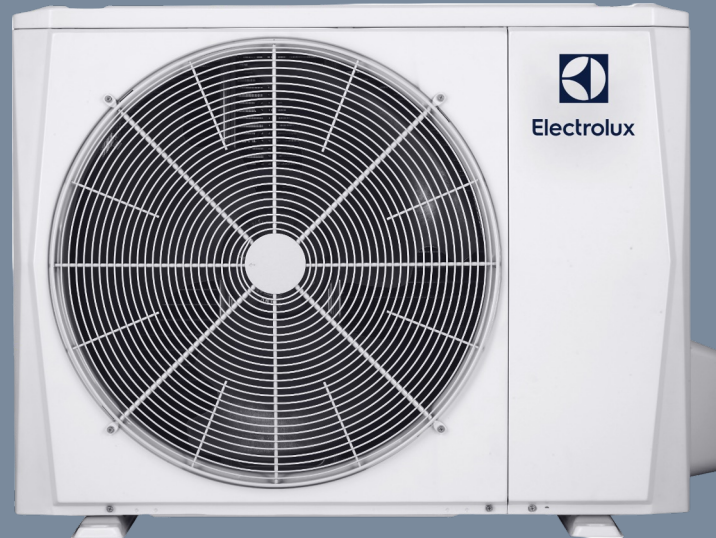

EMHP 4-6kW

EMHP 8-16kW

Heat pumps

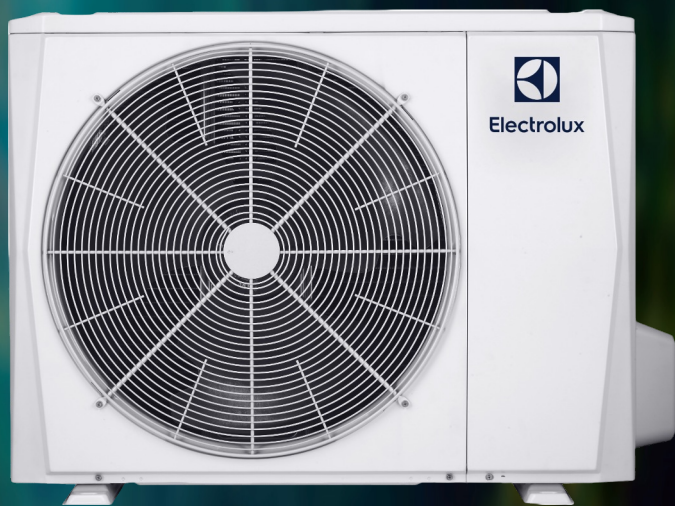

Hydromodule

EHB hydromodule
(with electric heater/without tank)

Hydromodule (with tank)

Extended working range

Integral inverter heat pumps

Refrigerant R32

High reliability ("Stop" function)

Intelligent control

USB function

App control

Heating capacity efficiency A+++

Constant water temperature increases comfort level

Remarkably quiet (56 dB)

DC inverter technology

4 kW of heat can be taken from the outside environment, of which only 1 kW is used for compressor operation.

System efficiency reaches 400%.

DC - fan motor
with inverter

DC - compressor
with inverter

CE/CCC
certification

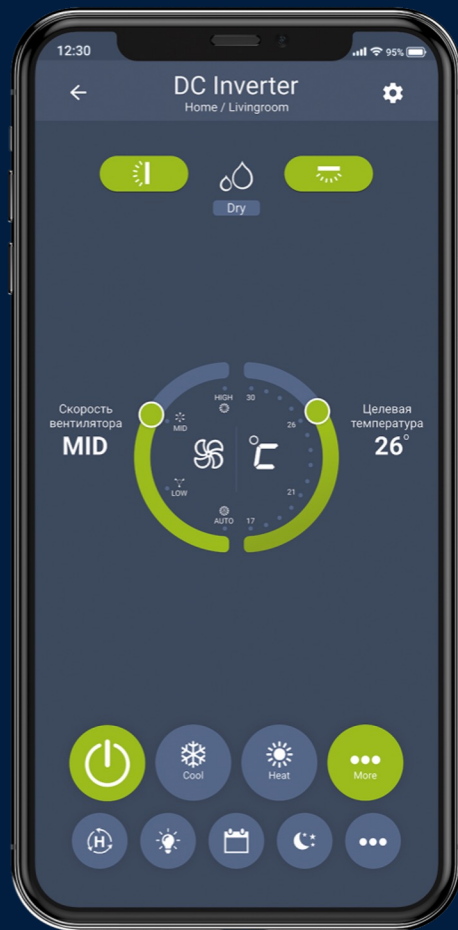

Continuous
drive motor

8 poles

Insulation
class E

Low energy
consumption

**Exclusivity only at the installation
works company - not available in the
chain stores**

Management through application

Remote control is possible via the Comfort Home app. Available in the App Store and Play Store.

Easy setup

Dual-zone management

Displays system status on the screen

Low electricity consumption

Convenient remote management

Energy saving recommendations

Timer setting and programming functions

*The support application service is not provided by Electrolux AB (publ.).
